

COVID-19 Decontamination

Oasis Environmental Group is pleased to provide full-service decontamination services for commercial space in response to the COVID-19 pandemic, specializing in offices, hotels, and public transportation.

Oasis technicians are fully trained to identify touch points and apply EPA registered disinfectants, ensuring complete surface decontamination.

Peace of Mind:

- Same gentle EPA-approved chemical used at Amazon Campuses
- Great for high-traffic hotel rooms and offices
- Will not harm electronic equipment, non-toxic to humans and animals
- One-time or recurring service available

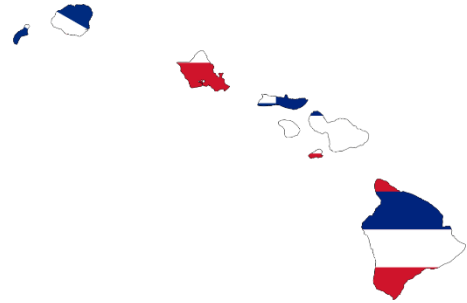

EPA-Approved and No Harsh Chemicals:

Oasis Environmental Group utilizes an **EPA-approved** liquid hypochlorous acid solution. This broad-spectrum disinfectant contains no harsh chemicals or bleach, is gentle enough to use around children and animals, and is safe for use on all hard surfaces.

Hypochlorous acid acts as a disinfectant, is the same chemical produced in our bodies by white blood cells to attack pathogens and fight infections, and is:

- Noncorrosive
- Nonflammable
- Biodegradable
- Safe for Sensitive Office Equipment

Multi-Business Solutions for all Islands:

Oasis is based on Oahu and can offer solutions throughout the Hawaiian archipelago for diverse business types including:

- Commercial Office Spaces
- Hotels
- Restaurants
- Airlines
- Grocery Stores
- Public Transportation
- Schools

Over 50 Years of Combined Experience Throughout the Hawaiian Archipelago:
